Ahmed Baloch

Full Web Developer

As a developer based in Islamabad, I excel in frontend technologies like Next.js 14, REACT, HTML, CSS, and TypeScript. I'm also proficient in backend tasks and API integrations. My experience with Python and Docker enhances my versatility, making me a well-rounded developer for modern web applications. I'm currently learning cloud-native technologies like Kubernetes, AI agents, and AI-powered applications. I'm always ready to leverage my skills to create impactful solutions.
